

120M PIPELINE INSPECTION CAMERA SYSTEM

The 120M Pipeline Inspection Camera System has a 12mm Pushrod 120M long and a 36mm or 46mm OD Camera with LED lighting. Can be used in ID Pipe diameters down to 60mm with various bends, however, by installing Skids, Centralisers and Quad Trolley, the System is capable of inspecting 450mm ID Pipes, Caissons and Tanks. Both these Cameras are self levelling. This keeps the picture in the upright direction at all times. It can inspect up to 120M. Used for Underwater and Atmospheric. Topside Controller has the capability of recording real time high resolution video along with stills and add text. Present the Client with a USB Dongle with the final video and stills.
